home.page.html

```
<ion-header>
  <ion-toolbar>
    <ion-title>
      Independiente
    </ion-title>
  </ion-toolbar>
</ion-header>

<ion-content>
  <ion-item>
    <ion-label position="stacked" >Dato a guardar</ion-label>
    <ion-input [(ngModel)]="dato1"></ion-input>
  </ion-item>

  <ion-
button expand="block" color="primary" (click)="Guardar()">Guardar</ion-
button>

  <div class="ion-padding">
    <ion-list>
      <ion-list-header color="tertiary">
        <ion-label>Registros</ion-label>
      </ion-list-header>
      <ion-item *ngFor="let registro of registros" >
        <ion-label>
          <h3>{{registro}}</h3>
        </ion-label>
      </ion-item>
    </ion-list>
  </div>
</ion-content>
```

Interfaz

The image shows two side-by-side mobile app screens. Both screens have a title bar labeled "Independ...". Below the title bar is a text input field labeled "Dato a guardar". In the left screen, the input field is empty. In the right screen, the input field contains the text "angel". Below the input field is a blue button labeled "Guardar". Below the button is a blue box labeled "Registros".

The image shows two side-by-side mobile app screens, similar to the ones above. Both screens have a title bar labeled "Independ...". Below the title bar is a text input field labeled "Dato a guardar". In the left screen, the input field contains the text "angel". In the right screen, the input field contains the text "xd". Below the input field is a blue button labeled "Guardar". Below the button is a blue box labeled "Registros". Below the "Registros" box, there is a list of items. In the left screen, the list contains the item "angel". In the right screen, the list contains the items "angel" and "xd".

home.page.ts

```
import { Component } from '@angular/core';

@Component({
  selector: 'app-home',
  templateUrl: 'home.page.html',
  styleUrls: ['home.page.scss'],
})
export class HomePage {

  dato1:string;
  registros = [];

  constructor() {}

  Guardar() {
    // tslint:disable-next-line:no-bitwise
    if (!!this.dato1) {
      this.registros.push(this.dato1);
    }
  }
}
```
